

Introducing VS 650 All-in

*All-in-one photobook binding and lamination system

Fully automatic binding and lamination

Binding Machines for Duplex Prints

Description

VS 650 All-in allows you to program up to 10 photobooks with varied specifications. All you need to do is simply feed in the paper manually at one end. The laminated prints will be delivered at the other end without any human intervention needed during the process. The VS 650 All-in carries out all the processes involved i.e. window cutting, hole-punching, thermal laminating, and auto-cutting of the laminated sheets which takes place with minute precision. Lamination can be programmed with or without texture for each book. In a very short duration, your stack of photobooks are ready to be stapled and bound using V-shape LayFlat binding technology.

Details

The VS 650 All-in can pre-program all processes involved in the photobook binding and lamination process. It comes with a 10-inch display with Windows 10 OS and PLC. Laminations can be programmed either with or without texture for each photobook. The technology of the manual feeder is patented. The machine also carries out the innovative patented V-shape LayFlat binding.

Specifications

Max. Paper Size
308 mm x 510 mm

Min. Paper Size
330 mm x 482 mm

Paper Width
330 - 380 mm

Paper Length
600 mm

Paper Thickness
0.15 mm - 0.3 mm

Synthetic Paper Thickness
0.125mm - 0.175mm

Speed
650 sheets per hour

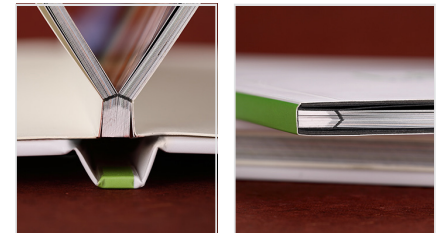

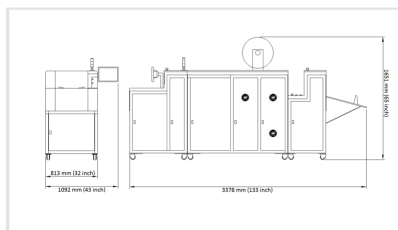

Air Compressor
Pneumatic connection required

Power Supply
220V 50 HZ

Max. Power Consumption
6000W

Machine Dimension
3378 mm (L) x 1092 mm (W) x 1651 mm (H)

Weight (approx.)
700 kg

Key Features

- Every aspects can be pre-programmed 10" (inch) display with windows 10 OS & PLC;
- Choice of laminations with or without texture at the same time;
- Specially designed rollers for accurate manual feeding;
- Innovative Patented technology for "V" shape LayFlat binding;
